

Joohee Bakes Macaron Tower Pricing Chart

* The Approximate Total Macaron Cost is an estimate based on the Approximate Total Macaron Quantity, multiplied by \$2 per macaron. Due to individual macarons' artisanal nature, the actual total macaron quantity used on the tower may vary, and therefore, determine the actual total macaron cost. Please note that we will charge only for the macarons *used*.

** Security Deposit for the Tower Stand will be returned if the tower stand is dropped off at our kitchen within 5 days from the event.

*** We may be able to offer delivery and set-up for the tower at a venue in Bergen County, NJ, depending on availability. Advance pick-up by customer is welcome at no additional cost, and we will securely wrap the tower and give instructions for special handling care. We will not be responsible, however, for any mishandling or accidents that happen after the tower has been picked up from our kitchen.

The diagram is not a proportionate representation of an actual tower and is for price estimating purpose only. All of the above information is subject to change by Joohee Bakes.
